Professional Summary

Full-stack Software Engineer with 3+ years of professional experience building enterprise web applications used by thousands of users across the utility industry. Proven ability to own features end-to-end across the stack, from Vue.js and React front-ends to C#/.NET APIs and SQL-backed systems. Consistently shipped in monthly release cycles while collaborating in a small, high-accountability Agile team. Graduated Summa Cum Laude from RIT (GPA 3.93) and actively building full-stack projects independently since leaving my last role.

Technical Skills

Front-end: JavaScript (ES6+), Vue.js (Vuex/Pinia), React.js, Vuetify, MUI, CSS

Back-end: C#, .NET, RESTful API Design, SQL, Java

Tools & Practices: Git, Visual Studio, GitHub Copilot, Claude Code, Agile/Scrum

Professional Experience

Software Engineer | Osmose Utilities Services

Jan 2022 – Jul 2025

- Owned multiple front-end features end-to-end across 3 enterprise web applications serving thousands of utility industry users, from initial design through production release on monthly cycles.
- Built and maintained complex, data-driven UI state across multiple enterprise applications using Vue.js with Vuex and Pinia, enabling reliable handling of large and frequently updated datasets.
- Maintained C#/.NET back-end services, resolving bugs and ensuring reliability of server-side data processing across production applications.
- Designed and refined RESTful API endpoints to efficiently retrieve and surface data from SQL databases, reducing friction between front-end and back-end layers.
- Collaborated closely with 2 other engineers and a 3-person QA team in an Agile environment, consistently delivering production-ready features on schedule.

Technical Projects

Fitness Tracker Web App | Sole Developer

Jan 2026 – Present

- Building a full-stack fitness tracking application using React, Vite, and Firebase, covering workout logging, nutrition tracking, and weight progress visualization.
- Integrated Recharts for interactive progress dashboards and Leaflet for GPS-based route mapping, and configured the app as a PWA for native-like mobile installation.

Emoji Mini-Games App | Sole Developer

Jul 2025 – Aug 2025

- Architected a modular browser-based game application in React, using hooks and functional components to manage complex UI state and game lifecycle logic.
- Designed emoji-driven UI/UX mechanics that prioritized intuitive, zero-instruction gameplay.

Education

Rochester Institute of Technology (RIT)

Graduated May 2022

B.S. Game Design and Development | **GPA: 3.93 | Summa Cum Laude**
